

Strengthening primary care in BC

Patient medical homes
Primary care networks

Discussion areas

- Current state of primary care
- Why the need for change?
- What are patient medical homes and primary care networks?
- How do they connect?
- Why this should matter to physicians?

Our story

Your feedback. Our priorities.

Why change?

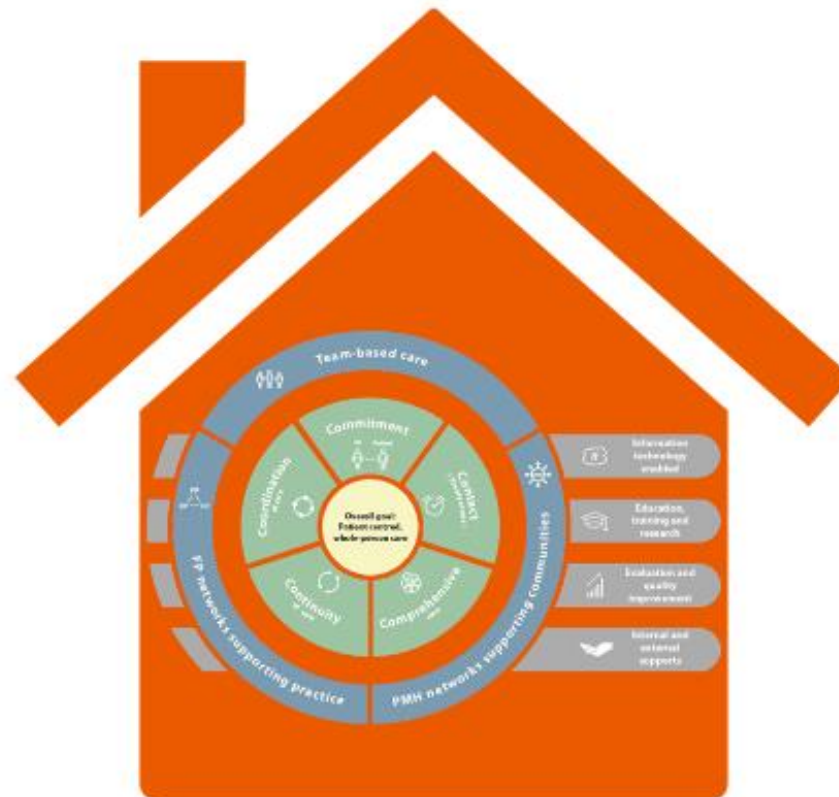

Physicians - value proposition

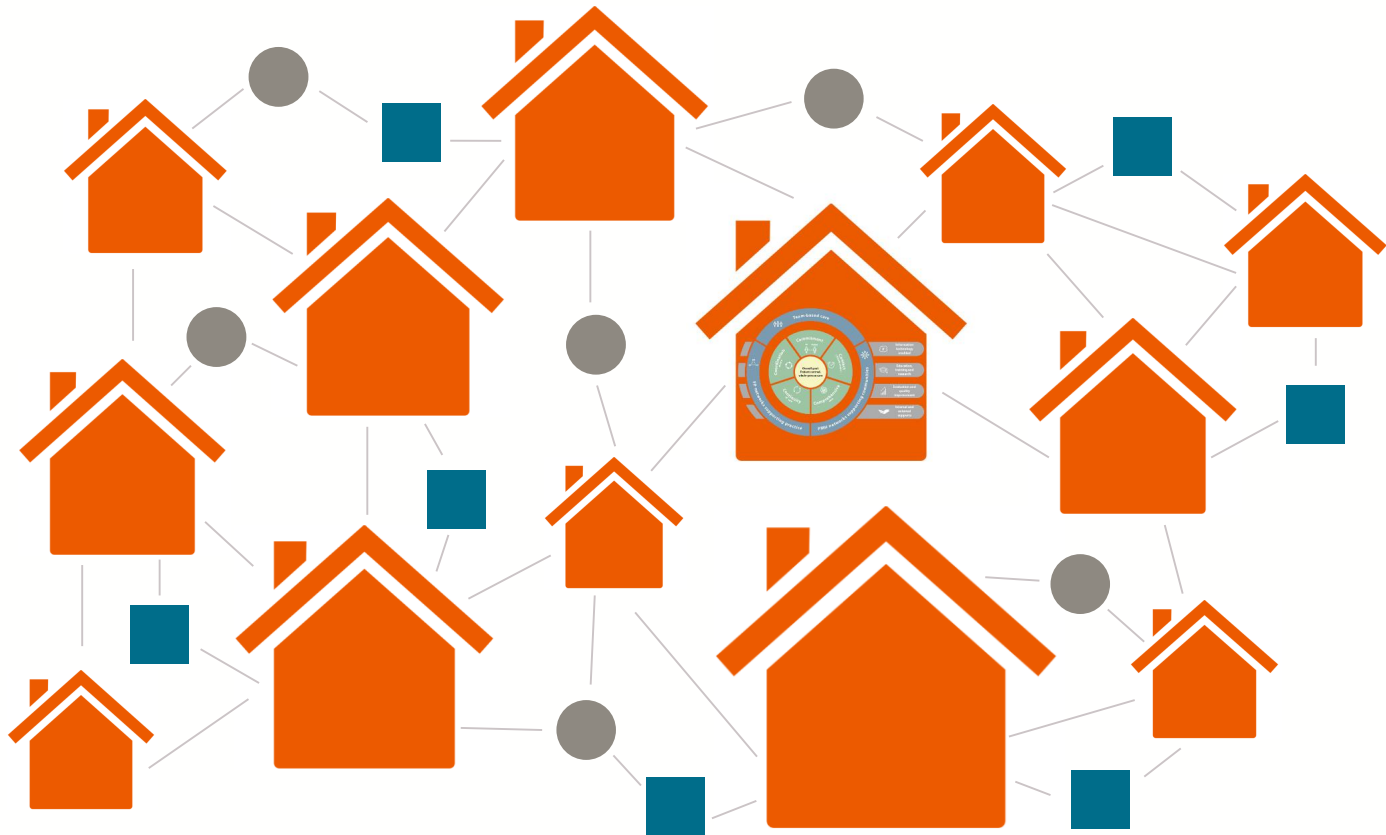

“To free you up to do the work you love to do, and what brought you into the medical profession in the first place.”

Patient medical homes (PMH)

Primary care networks (PCN)

PCN attributes

Access & attachment to quality primary care

Extended hours

Same day access to urgent care

Advice & information

Comprehensive primary care

Culturally safe care

Coordinated care

Clear communication

Integrated system of care

*Let's create a
clear path to care.*

Supports: practice & community

Patient Panel

EMR Functionality

Practice Assessment

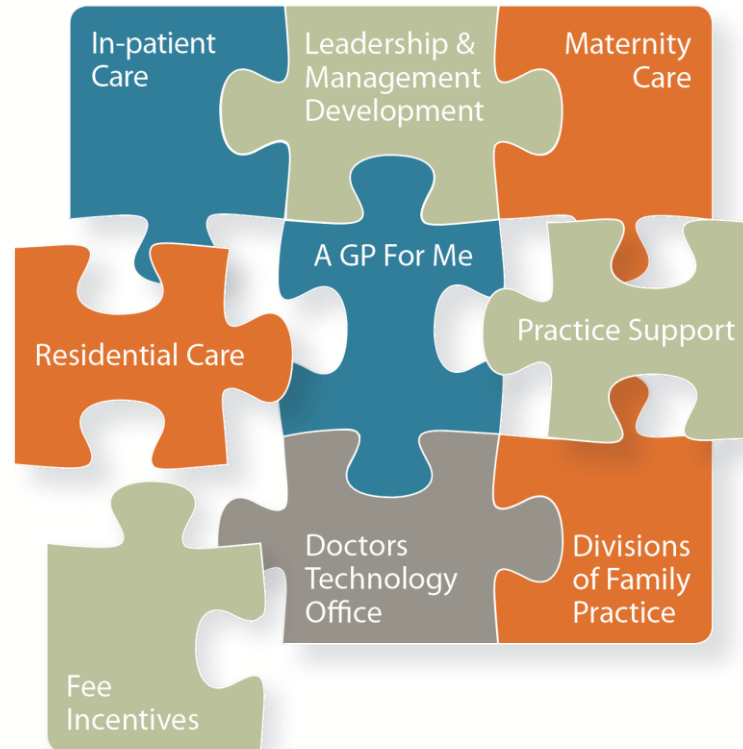

Small Group Learning Sessions

Patient Experience Tool

The path forward

- Start small.
- Learn together.
- And, then spread to all.

Building on our work
